IMPORTANT NOTES:

The old Time of Day definitions apply to the tariffs in this table (refer Network Price List section 6.2).

The tariffs in this table are obsolete and no new customers will be added to them. They are not available on application.

Network Tariff codes may appear on an invoice as the Service Rate

For General Supply Block Tariffs, Block 1 applies to the first 30,000 kWh per quarter. Block 2 applies to all consumption in excess of Block 1.

The network prices in this table (with the exception of Generated Energy) are inclusive of transmission passthrough charges and recovery of the NSW Climate Change Fund contribution.
