1. NTC's 7100 and 7200 have the capital only charge applied in the '00' billing permutation rather than a '70' permutation (which does not exist). Capital + non capital ACS metering charges do not apply to NTC's 8100 and 8300 and the '00' billing permutation for these tariff 's are set to zero. The '50' series billing permutation was not created for NTC's 8100 and 8300 as the 'None' ACS metering rate of zero is applied in the '00' series for these tariffs only.
2. As NTC6000 is applicable for basic metering only, the '50' and '70' ACS metering billing permutations are not required
